Kuloday Expands Product Offerings with New CMD Drawtape Bag Production Line

Kuloday Technopak Pvt. Ltd. is the largest manufacturer and exporter of quality polyethylene bags and sheets in India. Their products - which include a complete line of bags on a roll, refuse sacks, shopping bags and freezer bags - can be made of virgin or recycled material.

Located in Mumbai, India, Kuloday is ISO 9001:2008 certified and is a Government of India recognized Star Export House. They have won the Highest Exporter award for plastic bags from Government of India for many years, exporting polyethylene products to Europe, Australia and Africa. With the new CMD solution they look to develop the USA market.

Kuloday has invested in a CMD Global Drawtape Bag Making System and Global High-Speed Bag Winder and will offer quality drawtape trash bags on a roll with one-at-a-time dispensing.

"Kuloday is a strong, creative company that is taking the lead by offering new, unique products like drawtape bags on a labeled roll with easy dispensing," says Shaughn Hanley, CMD Director of International Sales. "The high production speeds of the CMD line meet the capacity requirements for Kuloday, and the bag winder offers low-count rolls at full line speed." Hanley notes that many international markets are requiring low-count rolls, and in the past, this has been a challenge for machinery providers. CMD has met that challenge with the Global High-Speed Bag Winder.

Kuloday Technopak Pvt. Ltd. is part of the Kuloday Group of Industries, with more than 30 years experience in the poly bag and film business.

The Group is 100% a family owned business that places high importance on values and commitment to all partners in the supply-chain. The firm has a state-of-the-art manufacturing facility for film and bags, and can produce products in 100% recycled as well as virgin material. Kuloday's products are well accepted among global retailers, municipalities; retail hardware/home improvement stores, cleaning companies and the hospitality business - and their business continues to grow.
