## TPBI Installs 5th CMD Global Drawtape System with Global Overlap Winders

The logo for TPBI features the lowercase letters 'tpbi' in a bold, dark blue, sans-serif font. To the right of the text is a graphic consisting of four overlapping, semi-transparent triangles in shades of green, blue, and yellow, arranged in a fan-like pattern.

TPBI, formerly known as Thai Plastic Bags Industries, is a visionary company with a rich history of growth and diversification. They seek to meet and exceed the needs of their customers and offer many value-added products.

TPBI is strongly vertically integrated, producing an array of products in the range of production, from recycling of post-consumer plastic waste into plastic film, to the production of bio-based paper cups, and on-demand digital printing.

In 2017 Mr. Sittichai Borrisuttanakul at TPBI discussed with CMD International Director of Sales, Shaughn Hanley, the plan for the firm to expand their product offering to include high-quality drawtape garbage bags. Adding to an already expansive product portfolio, TPBI focused on exporting the popular, easy-close-and-carry style trash bags globally.

The idea took off in a big way. Within 1-year TPBI installed a total of 5 CMD Global Drawtape Systems with Global Overlap Bag Winders. The systems allow for high-speed production of high-quality, premium drawtape trash bags on overlapped/interleaved rolls, where each bag is wound on top of the other, providing easy, one-at-a-time dispensing of the bag from the roll – a market offering that aligned very well with TPBI's commitment to value-added products as an important component of their product mix.

The high-efficiency production facility at TPBI includes 5 CMD Global Drawtape Systems with Global Overlap Winders.

The TPBI Group's business was initiated by the Borrisuttanakul family, with their experience and expertise in the production of plastic bags and plastic recycling. The business commenced from a small-sized factory to a large, multi-faceted corporation with a varied and growing product line of plastics and packaging products.
